PROFESSIONAL SUMMARY

Cloud and IT professional with hands-on experience in Linux system administration, AWS cloud services, and infrastructure deployment through practical technical projects. Skilled in server configuration, system monitoring, troubleshooting, and supporting Linux and Windows environments, with a solid understanding of cloud architecture, networking, and IT operations. Experienced in deploying and maintaining secure, scalable and reliable systems while documenting processes and workflows clearly. Strong problem solving and analytical skills with a growing focus on infrastructure management, system performance, and cloud-based solutions. Passionate about building resilient systems and continuously developing expertise in cloud engineering and modern IT infrastructure.

COMPETENCIES & EXPERTISE

- **Operating Systems:** Linux, Window
- **Cloud Platforms:** Amazon Web Services (AWS)
- **Virtualization:** VirtualBox, VMware
- **Networking Basics:** TCP/IP, IP addressing, basic network troubleshooting
- **System Administration:** User management, file permissions, system updates
- **Tools:** Microsoft Office, Git, Command Line (Bash)

EDUCATION

- Tai Solarin University of Education: B.sc (Ed) – Computer Science and Education (Hons): 2023

CERTIFICATION & MEMBERSHIPS

- Nigerian Computer Society NCS: Student Member
- National Youth Service Corps NYSC: Certificate of National Service
- Linux Essentials and Core Training Program
- AWS Certified Cloud Practitioner : in process

TECHNICAL PROJECTS

Portfolio Deployment (CI/CD)

- Deployed a personal portfolio website on AWS using S3 and CloudFront for global content delivery
- Configured custom domain management with Route 53 and secured traffic using SSL certificates via AWS Certificate Manager
- Automated deployment pipeline using GitHub Actions for continuous integration and continuous deployment (CI/CD)
- Implemented version-controlled infrastructure updates for faster and safer releases
- Optimised website performance and availability using CloudFront caching and edge distribution

Cloud Cost Dashboard

Cloud Cost Dashboard built to monitor AWS spending, budget usage, and service-level costs using React with AWS backend services.

- Built an interactive dashboard using React to visualise AWS cost and usage data
- Integrated AWS Lambda and API Gateway to fetch cost data from REST APIs
- Used AWS Cost Explorer data to track budget usage and service-level spending
- Created dynamic charts for cost trends, breakdowns, and alerts
- Deployed solution on AWS S3 with scalable serverless architecture
- Improved cost visibility for cloud resources through real-time reporting

AWS 3-tier wordpress deployment

- Designed and deployed a highly available 3-tier WordPress architecture on AWS, with the web tier in public subnets, application and database tiers in private subnets.
- Implemented IAM roles, Security Groups, and VPC subnets to enforce least-privilege access and ensure network isolation.
- Optimized database performance by deploying Amazon RDS in Multi-AZ mode with automated backups and failover support.
- Integrated Amazon CloudWatch monitoring and alarms to track system health, improve visibility, and optimize performance.

Serverless Contact Form Project

Built a serverless contact form using AWS Lambda, API Gateway, DynamoDB, S3 and Cloudfront.

- Configure IAM roles and Policies to allow secure communication between AWS services.
- Stored user messages in DynamoDB for backend processing
- Testing API endpoint and Verified data flow from the website and database.

Linux System Administration Practice

- Installed and configured **Linux systems in virtual environments**.
- Managed users, permissions, and file systems in Linux.
- Performed system updates, package installations, and service management.
- Troubleshoot system and network issues in Linux environments.

OTHER EXPERTISE

- Strong communicator with the ability to present information clearly and work effectively within cross-functional teams. Adaptable and able to manage competing priorities across multiple tasks and projects.
- Organised and analytical thinker with a proven ability to review, improve, and streamline work processes while maintaining accuracy and meeting deadlines.
- Skilled in problem-solving, team collaboration, stakeholder communication, and relationship management, with strong verbal and written communication skills.
- Proficient in computer applications and Microsoft Office Suite, including Word, Excel, and PowerPoint, with the ability to work independently and collaboratively in professional environments.
