PROFESSIONAL SUMMARY

Entry-level IT professional with hands-on experience in Linux system administration, cloud computing and IT operations. Skilled in system configuration, monitoring, troubleshooting and supporting both Linux and Windows environments. Proficient in Microsoft Office applications for documentation, reporting and collaboration. Possess foundational knowledge of AWS Cloud services and modern IT infrastructure. Demonstrate strong problem-solving abilities and a commitment to maintaining reliable, efficient systems while continuously learning and adapting to emerging technologies. Collaborative team player with strong communication skills and a passion for developing expertise in IT infrastructure and cloud technologies.

COMPETENCIES & EXPERTISE

- **Operating Systems:** Linux, Window
- **Cloud Platforms:** Amazon Web Services (AWS)
- **Virtualization:** VirtualBox, VMware
- **Networking Basics:** TCP/IP, IP addressing, basic network troubleshooting
- **System Administration:** User management, file permissions, system updates
- **Tools:** Microsoft Office, Git, Command Line (Bash)

EDUCATION

- Tai Solarin University of Education: B.sc (Ed) – Computer Science and Education (Hons): 2023

CERTIFICATION & MEMBERSHIPS

- Nigerian Computer Society NCS: Student Member: Ongoing
- National Youth Service Corps NYSC: Certificate of National Service
- Linux Essentials and Core Training Program
- AWS Certified Cloud Practitioner : Ongoing

HANDS-ON EXPERIENCE

AWS Cloud & Infrastructure Project

- Deployed a scalable web application on AWS using EC2, Application Load Balancer, and Auto Scaling.
- Configure virtual Private Cloud (VPC) networking including subnets, route tables and internet gateway.
- Installed and configure Apache web server on Linux EC2 instance using user data script.
- Monitor application performance and verified load balancing across instances.
- Implemented SNS notification to receive alerts from the Auto Scaling environment.

Serverless Contact Form Project

- Built a serverless contact form using AWS Lambda, API Gateway, DynamoDB, S3 and Cloudfront.
- Configure IAM roles and Policies to allow secure communication between AWS services.
- Stored user messages in DynamoDB for backend processing
- Testing API endpoint and Verified data flow from the website and database.

Linux System Administration Practice

- Installed and configured **Linux systems in virtual environments**.
- Managed users, permissions, and file systems in Linux.
- Performed system updates, package installations, and service management.
- Troubleshoot system and network issues in Linux environments.

OTHER EXPERTISE

- Articulate and eloquent communicator with ability to convey essential information with clarity and flexible team player who thrives in environments requiring ability to effectively prioritize and juggle concurrent project.
- Organized and analytical thinker with demonstrated talent for identifying, scrutinizing, improving and streamlining complex work process with a tenacious work ethic and ability to juggle multiple assignments at once to meet deadline.
- Excellent communication, customer relations, negotiating, teambuilding, problem-solving, organizing, influencing, leadership, interpersonal and impeccable verbal and written communication with spontaneous ability to become familiar with organization specific programs, goals and software
- Good command in computer, Microsoft office suite (word, presentation, excel) with ability to work well with a range of people both with and without supervision within and outside the organization.
